

My name is Africa!

Africa is my name!

I have about fifth-three kids,

I am the original continent.

They came from the sea and they named me,

They built jails and I was the first prisoner,

They started slavery and I was the most slave,

They caused wars and I was the black soldier,

They formed colonization and I was their colony.

There comes industrialization and I was their labour.

I had black and beautiful hair and they confused it with plastic,

I had a perfect language and they forced me with theirs.

I had minerals and they stole them,

I had the big five and they killed it,

They transformed climate and I am the most victim.

They can take everything but still they can't take my spirit.

My name is Africa, Africa is my name!
